## Editorial,

Our win on Saturday again puts us in the running for the championship, and the work of the team certainly makes our prospects look very bright indeed. The Queen's team was much stronger than when it played 'Varsity to a standstill a week ago, and it was distinctly out-classed in every department. All the five points of the play are enumerated in another column, and we need not repeat them here. Suffice to say that we know that the team is go-

ing to Toronto prepared to win, and we expect the cup to stay with us another season. Two features of the game are worth noting: The rooting and singing were the most inspiring ever heard on the Campus, and were something to be proud of. The gate was a large one, and will go far toward wiping out the deficit on the Argo. game. The students certainly did their duty nobly in every way. But it is something to ponder over why Queen's can send nearly a whole train load of supporters of both sexes to back

up a losing team, while McGill's championship team can travel all over the country, win games by the dozen and still never have a supporter with them, never get a send-off when they leave or a reception when they return. We are far from advising McGill men to emulate the sportsmanlike qualities of the Queen's students in every particular, but we can learn from them how to show our appreciation of the work of a team for the honour of our Alma Mater.

---

It is well to remind both Reporters and students that the first of December is fast approaching and that all subscriptions are expected to be paid by that date. The subscription list this year is the largest in the history of the OUTLOOK, and, if everyone meant a dollar, our success would be assured. There are always a large number of men, however, who allow their subscriptions to run on till the end of the year, and then leave College without paying up. No amount of pleading or talk about fairness and common honesty has any effect whatever on such, and the management has decided that it cannot afford to lose money in this way any longer. All subscriptions must positively be in the hands of the Class Reporters by Dec. 1, and the paper of those who have not paid by that date will be stopped. Class Reporters should begin their canvass immediately, and we trust the students will do their best to make the work easy.

---

The preparations for the Junior Dance have all been made, and it promises to be a most successful function. We wish it every success. It remains to be seen whether Medicine's recent attacks of the Dance mania is liable to lead to a further complication of the whole question,

but we think it should clear matters considerably. Medicine, last week, abolished the long standing custom of holding a Faculty Dinner. That was the time, if ever, for the Medical Students to declare themselves in favour of the Year system. Instead of that they are going to hold a Dance in their own building, which they tell us is to be a purely Medical affair. Precisely what degree of exclusiveness this indicates it is hard to say, but it distinctly shows what a farce it is to speak of Class and University spirit in Medicine. Arts and Science are willing to give up their Dances in favour of University Class Functions, but so long as the other Faculties continue under the old system, they certainly have a right to preserve their own traditions in the way they think most fit. Medicine will dance, Law will eat; so please dear, good, kind Faculty let Arts and Science have their own nice quiet Conversats.

---

#### **PRINCIPAL PETERSON GIVES HIS VIEWS ON THE ALAS- KAN AWARD.**

At the Annual Dinner of the British Schools' and Universities' Club last Monday night, Principal Peterson responded to the toast of "The Empire."

Referring to the recent Alaskan decision, Dr. Peterson said no sensible Canadian, and there were very few others needed to be told that he ought to have implicit confidence in the Lord Chief Justice of England and that they had speedily realized the fact that the constitution of the Tribunal was such that it was practically a hearing before Judge Lord Alverstone, and it was his judgment that had gone against them. While Lord Alverstone did all his work and rendered his judgment in the true spirit of an impartial jurist and with the

most perfect fairness, his verdict had gone against Canada and the only difficulty remaining in the situation is that the natural feeling of disappointment is somewhat aggravated by two considerations.

The constitution of the Tribunal which contained three commissioners, who had already committed themselves on the subject on which they undertook to adjudicate, had been overruled by the British Government, and, secondly, that two Canadian representatives had put it on record that in their opinion Lord Alverstone had changed his mind in regard to the most northerly islands in the channel, and, after first agreeing with them, had, without notifying them of his intention, finished by awarding the islands to the United States by way of a compromise.

Speaking of the feeling for greater unity now pervading the British Empire, Dr. Peterson said nobody in the Old Country now ever alluded to the possibility that the colonies would ever break away from the Mother Country, and that the colonies for their part had no intention of ever doing so. Touching upon Mr. Chamberlain's fiscal policy, the speaker said he did not agree with those who thought that all was for the best, and that England is doing nothing for the preservation of her trade. "It is stimulating to hear about spreading the Empire by education and the cultivating of high ideals," said the speaker, "but that may not be enough. England must learn how to protect her interests in the way that other countries know so well how to protect their interests."

The Dramatic Club at Minnesota will produce "Everyman" this year.

## CAR 1002—TOURIST.

### The Story of the Mining Trip.

(Part the second).

The rest of our stay in Ishpeming was taken up in visiting different mines in the neighbourhood. In the morning it was usual for Dr. Porter to take us through the surface plants, where we could make notes on the hoisting engines and other pieces of machinery indispensable to the running of a mine. At such times, the Doctor would take great pains to make clear to us any intricate piece of mechanism, and, in general, helping us to a better knowledge of our profession. Again, in the afternoons, arrangements were made to go underground in one or other of the mines. In this way we visited successfully the No. 2 Soft Ore, Section 16, Iron Mines, and Section 21, and many others, all belonging to the L. S. I. Company.

A very interesting case of shaft-sinking was seen at Negaunee, where the ore had to be reached through 120 feet of sand and gravel. By some miscalculation, allowance was not made for the water coming in from Teal Lake, near by. This water washed in the sand as fast as it was mined out, and, in consequence, expensive pumping machinery had to be installed, and special methods of shaft-sinking employed to prevent this. At present, the work is progressing rapidly, and has cost so far \$300,000 for 200 feet of shaft.

Next, in course, were the offices of the two companies. These we visited, and saw the methods employed in transacting the business of the mines. The engineers were kind enough to show us the maps of the mines we had visited, and to explain how they were plotted from the notes made underground by the surveyors. According to the maps, none of us had

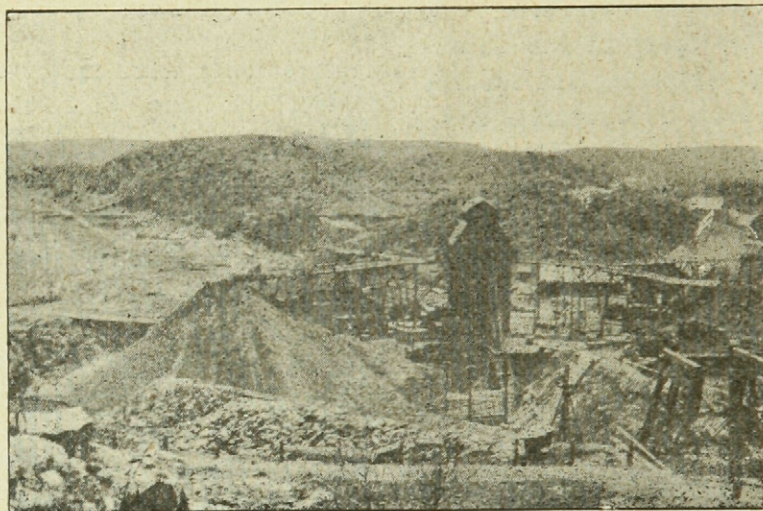

the bump of location very largely developed, for the tunnels shown on the maps did not look like the ones we had gone through.

May 15 was fixed for the departure of the car from Ishpeming. In the early part of the day, however, an excursion was made to Marquette, in order to see the blast furnaces in operation there. Marquette is a pretty little town on the South shore of Lake Superior, and is the shipping place for most of the ore from the aforementioned range. As has already been inferred, a certain amount of this ore is smelted at Marquette, or at least three or four miles out of the

knows, in the centre of the Keweenaw Peninsula, the great copper-bearing region of Michigan. There are no mines in the town itself, though there are several within the radius of a mile or two; the rest are strung out in a line, down the centre of the Peninsula. If wonders had been witnessed before, surely no words can describe what next came on the scene.

Of course, we arrived at night, and were, as usual, side-tracked at the station. All the town, except the Houghton Mining School, turned out to see the show, and were rewarded by the condescending smiles of those within the car.

SALISBURY MINE—SURFACE VIEW.

town. The smelter is very much smaller than the one at the Sault; but in many ways more interesting from an engineering standpoint. The usual notes were or were not taken, and at five o'clock or thereabouts we turned to Ishpeming. Here our car was waiting for us, and on our arrival, was hitched on behind the Houghton train and away it was whirled. So ended our stay in Ishpeming; a pleasant one to all of us. The pleasure, of course, was not obtained by everyone in the same way.

Houghton was our next stopping place. This town is, as everyone

Directly across the river, on which Houghton is situated, is the Quincy Mine, or at least mines, for they are seven in number. These mines are on the top of a ridge some hundreds of feet high. Up this hill we scrambled that memorable 16th of May. It would not be well to exaggerate, but it must have been quite 100° F. in the shade that day. The hill was composed of sand, and with the help of this, the sun managed to cook us fairly well. The charred remains of the expedition were somewhat revived when they arrived at the top, by a cool breeze.

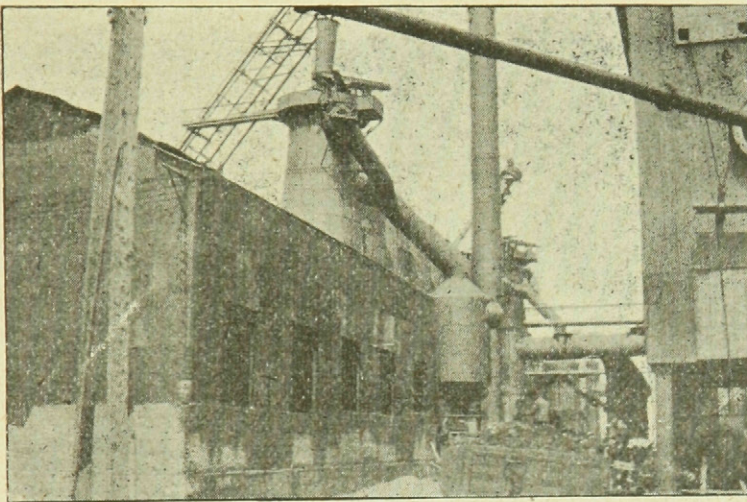

The machinery and shaft-houses occupied our attention all morning. Such machinery! That of the Iron Country was dwarfed into insignificance in comparison. The cost of this machinery was necessarily very great, and it was owing only to the richness of the ore that they could afford to instal such expensive plants.

The copper occurs in its native condition, distributed sometimes in large masses, but more usually in fine specks throughout the ore.

Towards the latter part of the morning, a copper smelter was visited, and the process of refining the copper

Sunday! A day of rest, also a day of letter-writing. The same seems a paradox, does it not? William, the porter, he of the dusky hue, tried to waken us up at eight o'clock. He managed to do so, but that was all. He might have been heard going around to each bunk pulling at the curtain, and saying with a strong African accent: "Time's gawn, dah! Time's gawn! Time to get up, sah!" He had the proverbial hardness of head, for no amount of boots had any effect on him.

How glorious it was to sit in the car and "smoke" and read, such a relief after a week of thinking.

A BLAST FURNACE.

after it comes from the concentrating mills was watched. The apparently pure copper is put into a furnace with limestone and charcoal, and after a treatment, too lengthy to describe here, the really pure metal in a molten condition is ladled off, and poured into moulds which are, in turn, immersed in water to solidify the copper.

The same afternoon a chance was given us to visit the Quincy Concentrating Mill. A number of the boys took advantage of the offer, and, needless to say, no one was sorry for having gone.

Sunday over, the car was taken to the Atlantic Mine, four miles out of Houghton, and Monday was spent in making notes of the surface works of the Atlantic and Baltic Mines. That evening we spent an enjoyable evening at the residence of Mr. Staunton, the Superintendent of the above mines. This gentleman is the possessor of a house full of curios, of which are only obtained by a man of travel and culture, and one who has a large income to back his fancy. Mr. Staunton will have occasion to remember the McGill students, if only for the fact that while he was elsewhere en-

gaged, we enscribed our names on one of his collars, and left it as a souvenir.

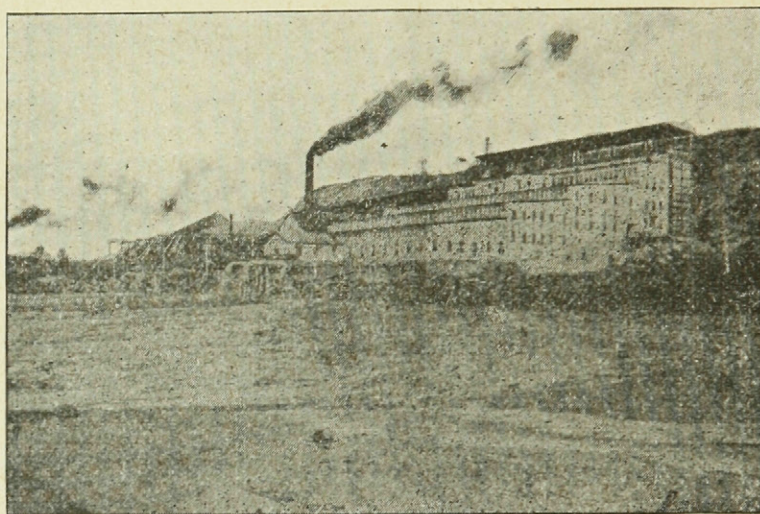

Half a mile below the surface of the earth sounds a long way; much more so when you have a half a mile of this material above you. It was our lot to go underground in the Atlantic Mine the day following our reception by Mr. Staunton. This mine, though by no means the deepest that we visited, was the deepest that we descended into. The shaft is inclined at an angle of  $10^{\circ}$  to the surface, and has a length of 3,100 feet, which make the lowest level more than half a mile below the surface.

of the argument when we returned to the surface.

The fact of our having been down to such a deep impressed everyone most, but there were many things learnt despite the poor lunch.

The Baltic mine was visited next day, and this time we had to climb a matter of 2,000 feet of ladders up and down. It was hard work, but the mine proved so interesting that we were amply repaid. A little horse-play, in which candles and sweaters played an important part, served to make the time pass quickly.

Now comes a change in pro-

A COPPER CONCENTRATING MILL.

The miners allowed us to run the rock drills, in my case, with disastrous effect, for the compressed air-pipe burst, and a scatteration of miners and students immediately resulted.

Huge rats infest the mine, and as we had to stay down till well on into the afternoon, this fact interfered with the sleeping propensities of several of the party. Some Finlanders received a scare that day, but were not quite sure that the cause of it was "rats."

Our lunch was particularly poor that day, and the cook got the worst

gramme, from mining to ore-dressing. The car was moved to Redridge, on the Lake shore, twelve miles from Houghton. There are a number of concentrating mills here, belonging to the different mining companies in vicinity. Here the ore is crushed and the copper separated from the surrounding rock by virtue of its specific gravity. The machines for crushing the ore are worked by steam, and can handle 500 tons of ore a day. Some of the mills have as many as twelve stamps. The quantity of ore treated per annum is obviously enormous.

Close to where the car was stationed, there was an artificial lake for supplying the mills with water. After the day's work was over, rafts were made with the result that several students went in for an unpremeditated swim. Great amusement was caused by two of the boys finding a wooden leg on the bridge, which was close to the car.

After a stay of two days in Redridge, we found ourselves back in Houghton again, with the temperature, this time, moderately low.

The most wonderful things seen on the trip were the property of the two companies, "Tamarack," and "Calumet and Heckla." The principal mines of these two companies are situated near the town of Calumet, twenty-five miles from Houghton. The Tamarack Number 5 has the honour of being the deepest mine in the world, having a depth of a few feet less than a mile. The Calumet and Heckla mines have all inclined shafts, some of these being over a mile in length.

The machinery again arrested our attention. It is said to be the largest and best of its kind in existence.

Unfortunately, it was raining very hard the day we visited Calumet, so we did not see as much of the mines as we could have wished.

And, now, our trip draws very nearly to a close. On the 26th of May, an excursion was made to Lake Linden, some few miles from Calumet, to inspect the concentrating mills of the last named companies. Here one of the mills had 22 heads of stamps, each having a 500 ton capacity. The largest pump in the world supplies this mill with water. It is 66 feet high, and pumps 60,000,000 gallons of water in 24 hours.

With our departure from Lake Linden, our trip practically ended.

The car was sent back to Montreal, and Dr. Porter, Mr. Depencier and Mr. Grier went back with it. The rest of the party took work in the mines and mills, eight of us returning to Ishpeming and Negaunee, to work there.

Not having been on any of the previous Mining Tours, I can in no way compare the one of last spring with them; but, speaking from a single standpoint, I can say that no trip could have been better arranged to give us, as students, a more practical idea of our future calling.

To Dr. Porter, principally, do we owe thanks for the success of the trip. It is through his indefatigable efforts that the Mining Tour of McGill has been made what it is at present. It must be something of importance when Mr. Chamberlain, the ex-Colonial secretary, speaks of it as he did.

Finally, in the name of all the students present on the Tour, I wish to extend a hearty vote of thanks to the professors, Dr. Porter, Dr. Adams and Dr. Stansfield, for an enjoyable and profitable month spent in car 1002.

C. G. C.

## McGILL, 21—QUEEN'S 13.

In the fastest, cleanest most exciting game that has been seen this year on the Campus, McGill secured a decisive victory over Queen's by the substantial margin between 21-13. It was a struggle between giants from start to the finish. There were several distinctive features which will make the game one long to be remembered by the students.

The first was the unusual celerity with which the play travelled from one end of the field to the other. McGill would be pressing hard on Queen's defences when suddenly a free kick or run would carry the ball well past centre and the aggressors would be on the defensive in turn. Profiting by the experience gained from 'Varsity, the wings followed up splendidly. The signal having been given and a kick expected from the McGill halves at least two of the wings would be down the field ready to down the Queen's halves.

Although McGill were easily the superiors in the wing line, the back divisions were about equal in the kicking tactics. Strachan and but Hamilton and Gamble held their Simpson are both splendid punters, own. McGill halves worked in several pretty runs, and being well protected by the wings, were better able to do so than Queen's. The superiority of the McGill wings greatly crip-

pled the effectiveness of the Queen's back division in that line.

Queen's have always shown themselves worthy opponents of the red and white. Although the larger score is on the side of McGill, yet strange as it may seem, the ball was more in McGill territory than in Queen's. This is mainly due to the tactics adopted by their halves, namely, of kicking far down the field into touch. What is more, they usually secured their throw-in too. Pannell at quarter deserves special mention. Time and time again, his curly head would shoot through our line only to be sat down hard and suddenly a yard or so from where he started. Strachan and Simpson both punt splendidly and Simpson worked in several tricky runs. Nearly all the play, however, on their part seemed individual, and there was no combination as seen in McGill formation.

McGill, on the other hand, won on team play. A runner was always supported, and if the ball was not carried on, he was largely to blame or the tackling rendered it useless. Martin's run for fifty yards and then the pass to Zimmerman is but an example of the combination and mutual support of the players. Behind the line, Gamble and Hamilton punted in their usual form, and Zimmerman's runs were the feature of the day. Sutherland always punted into touch when

closely pressed, the best thing to do under the circumstances. The scrimmage always got the ball out clearly to the quarter and the numerous free kicks were due to McGill breaking up the Queen's scrimmage and offside of the wings. Mohr, Martin and Greey showed up the most conspicuously on the line and followed up well. To our inside wings and their support is due McGill's supremacy in the scrimmage. Without doubt, McPhee, Inksetter and Benedict, are the trio of the League.

It looked like old times to see the attendance. The grand stand was well filled with ladies and their escorts. The bleachers were packed, and the rooting was like that of last year, when we were the "best in the business" in that line. From the North end especially came the best yells and songs. The intervals were filled with a melody, which, if not celestial, yet lacked nothing in vigour. Queen's supporters also showed themselves as rivals on a smaller scale to those of the red and white. Manager Gibson managed the rooters, and after all he is the best yell leader we have had.

It was almost an ideal day for the game, cold and bracing, no sun and a neutral wind. The ground was slippery and moist, but did not in any way diminish the quickness of the players. At 2.30, the rival teams lined up in this order:—

<i>McGill.</i>	<i>Queen's.</i>
Hamilton.. ..Full.. ..MacDonald	
Sutherland.... ..Halves.... ..Simpson	
Zimmerman.. ..Halves.. ..Strachan	
Gamble.. .. ..Halves.. .. ..Drury	
Richards.. .. ..Quarter.. ..Pannell	
McPhee.. .. Scrimmage .. Dominion	
Inksetter.. .. Scrimmage.. ..Platt	
Benedict.. ..Scrimmage.. ..McLellan	
Molson.. .. ..Wings.. .. ..Cameron	
Mohr.. .. ....Wings ..Branscombe	
Hammond .. .. Wings .. .. Young	

Graham .. .. Wings .. .. Harpell  
 Martin.. .. ..Wings... .. ..Patterson  
 Greey... .. ..Wings... .. ..Gleason  
 Referee—Hendry, 'Varsity.  
 Umpire—Gordon Fleck, 'Varsity.

### THE PLAY.

Queen's kicked off beyond McGill's twenty-five yard line, where they secured the ball off a dribble by Richards. In the scrimmage they got a free kick which Richards blocked. In a return of kicks, Hamilton put the ball in touch, and on securing the throw-in Gamble repeated the kick with the ball at Queen's twenty-five yard line. Gamble again kicked to Queen's touch line, but they secured another free kick and got the ball well out. In the return Gamble kicked well into their quarter field, and Greey secured the ball by a splendid run, although he was hurt in doing so. Richards kicked over the line, but MacDonald saved, but on another free kick, which the referee continued to deal out lavishly to Queen's throughout the game, Zimmerman returned, and Greey following up well downed MacDonald on the twenty-five yard line. Here McGill secured their first free kick which went into touch at the five yard line. They secured the throw-in and in a tandem play Gamble went over the line. The touch was not converted.

### Score, McGill 5—Queen's 0.

Queen's seemed to wake up. They gained twenty-five yards on the kick off and fifteen more on a free kick. A few minutes after Simpson kicked a touch in goal.

### Score, McGill 5—Queen's 1.

Molson kicked from quarter. After several scrimmages Queen's got their usual free kick and Strachan "freed" Hamilton's return. He gained a few yards by putting the ball in touch, and then kicked over for another point.

**Score, McGill 5—Queen's 2.**

The remainder of the half was very open. Following the kick from quarter, McGill got a free kick. Sutherland caught the return and made a pretty run of twenty yards. Gamble repeated the trick for another twenty. The usual Queen's free kick brought the ball well into McGill's territory until Gamble boosted in forty yards, and MacDonald was downed on the tracks. Then Strachan went off for tripping Sutherland. On the return of Queen's free kick, Benedict secured the ball as the whistle blew, and went over. It was not allowed as the ball had struck the trees on the east side and bounced back in play.

**Score at half time McGill 5—Queen's 2.**

On resuming play, the ball hovered about centre for some time. Zimmerman made a pretty run and then Sutherland kicked to Queen's fifteen yard line. Martin was sent to the side for a few minutes at this stage. Molson crawled over the scrimmage and secured the ball amid frantic cheers from the bleachers. McGill secured a free kick and the ball was held by Queen's on their five yard line. Here they lost it, and one of the best pieces of play of the game occurred. Once, twice, McGill bucked on the right wing, but the third time Billy Richards fell in a heap around the left end and just got over. Sutherland converted.

**Score, McGill 11—Queen's 2.**

Sutherland returned the kick off. For a few minutes the lines fought at centre until MacDonald kicked to Gamble, who was jumped on at the McGill five yard line. A free kick into touch saved the situation until a Queen's free kick brought it back again. Gamble secured a distinct gain for McGill and then our scrimmage got in some fine work for ten yards. But those dreadful free kicks,

as horrible as their colours, came over our line, and Gamble was knocked over while Queen's secured the ball which Strachan placed neatly between the posts.

**Score, McGill 11—Queen's 8.**

Then McGill, in the gathering darkness, made some brilliant plays. Greey downed Simpson for a great gain. Queen's relieved by a long kick, and *then* did the most spectacular play of the whole season occur. Martin secured the ball behind the wings, and started down the field. For fifty yards he kept the speed until tackled by MacDonald when Zimmerman secured his pass and gained ten yards more. Hardly had Queen's got their line formed before Richards shot the ball out to Zimmerman who went over like a flash. The try being unconverted, the Score stood.

**McGill 16—Queen's 8.**

The darkness now greatly interfered with the game, as did a yellow dog who persisted in mistaking Molson for something to chew. Off Sutherland's punt, MacDonald made a long run, and in tackling him, Greey was hurt. Martin broke through and stole the ball, and it was then taken to Queen's forty yard line. Here while Queen's were peering into each others faces to distinguish the players, Inksetter dashed through and spurted down the field. On being tackled he passed to McPhee who romped over for another five points. Molson could not see the posts, and kicked wide.

**Score, McGill 21—Queen's 8.**

Macdonald kicked to Hamilton who ran for a few yards. Then on from a scrimmage, Queen's secured and kicked to Sutherland who could not see the ball and was downed on the lie. Here Queen's, who had possession of the ball, went over for an unconverted touch. With forty seconds to play that ended the scoring.

**Final Score, McGill 21—Queen's 13.**

AFTER-THOUGHTS.

After all we have no yell leader like Gordon Gibson. The cheering and songs yesterday were worthy of the "good old days of yore."

A hearse driver was watching the game from his vehicle on Sherbrooke St. After the game he turned and mournfully followed by the bus containing the Queen's players down Mansfield.

That yellow dog was Queen's "hoo-doo." Didn't you see the way it grinned at Capt. Mohr.

The Freshies showed unusual loyalty by carrying away the Star Bulletin and hanging it on the Queen's arm in front of the R. V. C.

Next Saturday we will (D.V.) celebrate the victory by doing a few "stunts" ourselves.

Queen's supporters showed that they also know something of rooting, yet, you never hear it "at home."

Watch for two championships next Saturday.

The singing was a feature of the game. It helps fill in the "awful voids" between the halves.

Referee Hendry was very strict for McGill. Score of Free Kicks: Queen's 21—McGill 7.

And as Manager Gibson said to himself as he surveyed the noble army of warriors clad in the red and white:

"These are the men in whom we trust,

"They are the men who know they must

"Make Old Toronto bite the dust;

"God help us now, we'll win or bust."

**QUEEN'S II. 12.—McGILL II. 12.**

The morning game for the Intermediate Championship proved quite as interesting in many ways as the big game in the afternoon. Though the

teams could hardly be called evenly matched, the Queen's men put up a hard fight and there was all sorts of excitement. McGill had hard luck and the score is no indication of the play. First, Lucas hurt his knee and though he pluckily played on, he could do but little and had finally to retire. Then Jennings got ruled off and while McGill was playing a man short, Queen's scored eleven of their twelve points. The only place Queen's showed up strong was in the scrimmage and here they put it over the McGill trio. McGill wings were much stronger and more aggressive, Malcolm especially showing up as the bright particular star on the line. They broke through at will and time after time downed the Queen's halves for substantial gains. Savage played an excellent game and Patterson, though making a few fumbles in the first half, fully made up for them by the sensational touch-down which tied the score. With George Mac in the game again, the team should have no trouble in winning next Saturday in Kingston and securing the Intermediate Championship.

Promptly at 10.30 the teams lined up as follows:

McGill II.		Queen's II.
Likely	Full	MacDonell
Savage	Halves	Crothers
Lucas	Halves	Gleason
Patterson	Halves	Smith
McCallum	Quarter	Read
Beckwith	Scrimmage	Gibson
Crosby	Scrimmage	Thompson
Young	Scrimmage	Gillis
Malcolm	Wings	Falconer
Kennedy	Wings	Daly
Stevens	Wings	Sloan
Wilson (Capt.)	Wings	Bailly
Jennings	Wings	Oswald
Haffner	Wings	Gleason

From the kick-off the ball was worked slowly up the field by kicks and mass plays until McCallum was pushed over for a try, which was not convert-

ed. Lucas, Savage, Patterson and Wilson got in some pretty runs, which carried the ball to the Queen's line. It was pushed back, however, and the play surged back and forth for some time until McGill got a free kick at Queen's 25 yard line and by a swift follow up Queen's was forced to rouge. Two minutes after, Savage kicked over the line again for another rouge. Just at this juncture, Jennings was ruled off and the difference in weight was soon evident. Queen's forced the ball down past centre and kicked well into McGill's territory. At quarter field they were awarded a free kick and Likely rouged. Queen's got the ball from the kick-off and out of the first scrimmage. Gleason secured the ball and kicked a pretty drop from the field. Queen's began to rush matters and forced the ball to McGill's line. A free kick relieved matters somewhat but finally Read ran to the line and a mass play carried him over. The try was not converted and just after play was resumed and while Alfie was still performing a *pas seul* the whistle blew for half time leaving the score

**McGill II. 7.—Queen's II. 11.**

On resuming play the ball hovered for a long time around centre, but Queen's finally kicked into touch well into McGill's territory and a free kick carried the ball into touch in goal. The ball stayed in McGill territory some time and at one time was right on the line. Lucas had to retire here, Oswald going off to even up. A free kick relieved matters. Crosby was hurt at centre, but Jennings got back into the game. Steadily the ball was forced down field, Malcolm going through the line for substantial gains. Numerous free kicks followed; finally McGill secured a kick at centre and Haffner, by a swift follow up, rushed the ball to Queen's quarter-field Patterson secured the ball on the Queen's fumble and in the most sensational run of the game romped over for a try, which tied the score. There were but a few

seconds to play and the play ended in Queen's territory with the final score

**McGill II. 12.—Queen's II. 12**

### **MCGILL HARRIERS TO ENTER A TEAM FOR THE Y.M.C.A.**

Next Saturday (Nov. 21) the lower Lachine road will be the scene of one of the most interesting events of the season, namely the "Five Mile City Championship Meet."

The Race will start from Queen's Park over a course two and a half miles out Lower Lachine road and back.

The Montreal Y.M.C.A. are putting up a cup for the winning team.

The Clubs competing are:—

Montreal Y.M.C.A. Harrier Club.

McGill Harrier Club.

Grand Trunk Harrier Club.

Montreal West Harrier Club.

The teams will consist of five men each; McGill team will be picked from the following:—Lochead (capt.), Stevens, Stewart, Hall, Edwards, Scott, who can be depended on to do their best to uphold the honor of "Old McGill," so all up boys and help them win.

### **MCGILL BOXING CLUB.**

#### **Practice Hours Arranged.**

The First General Class Meeting of the Boxing Club was held Friday night and the attendance ensures a very successful season. The membership at present will be from thirty to thirty-five and the Executive expect to have a full membership in a couple of weeks of at least forty. The arrangements of the Clubs are now definitely settled. Members will have the opportunity of having three lessons a week consisting of one general class meeting from 3 to 4 Saturday afternoon and the choice of any two out of the six practice lesson hours which are as follows:—Monday, 5 to 6. Tuesday, 12 to 1 and 9 to 10 p.m., Wednesday, 5 to 6, Thursday 12 to 1, Friday, 9 to 10 p.m., Mr. Jacomb, whose

services the club have been fortunate to procure and to whose interest and assistance the club is already greatly indebted, will be present during these hours to criticize and instruct. The club provides gloves, and a cupboard has also been fitted up for use of members. Membership tickets and any further information can be had from the President, Mr. W. Muir Edwards, Eng. Bldg., or from the Secretary, Mr. E. J. Carlyle, Sci. '04. The committee consists of Messrs. Ogilvie, Benedict and Chandler.

### BASKET-BALL.

The rapid progress that basket-ball has been making in the last two years to the front ranks of College sport is not wonderful, since it is an excellent, all-round game, which appeals to every lover of exciting sport. Unlike football and hockey, it can be efficiently played by the average man, and with comparatively little danger of the serious accidents so frequent in those games.

The Year practices were commenced this week, and the candidates for the teams are settling down to good, hard work, under the new managers. The Fourth Year have not yet elected their manager, but they can be calculated on to have an excellent team in condition for the first match. The Third Year have elected Mr. Rabinovitch, who played such an excellent game for '05 last year, as Manager. The Second Year are fortunate in having Mr. Higgins, Captain of last year's first team, to manage them. Apparently, a happy choice was made by the First Year in selecting Mr. Davis. Mr. Davis has played for a number of years at the High School, and good results may be looked for with the material he has in hand.

Even the old gymnasium has been considerably improved by the erection of large platforms behind the baskets, making good shooting possible where,

hitherto, generally the worst shots scored.

The Y. M. C. A. players are finding some difficulty in obtaining permission to enter an outside league. It is expected that their difficulties will be overcome, and the much-desired city league formed. Students are glad to hear that the Victoria Rifle Regiment are proposing to start to play the game. Their offer to join a league, if made, would be gladly welcomed by McGill.

It is very pleasing to see the interest and enthusiasm displayed by the Donalds in their basket-ball. Their officers are to be congratulated on their success last year, and their enterprise in securing such a valued coach as Mr. Powter augurs well for even greater success this season.

### BASKET-BALL. R.V.C.

**Sophomores tie the Freshmen.  
Seniors defeat Partials.**

The first two matches of the Inter-Class series were played off Saturday morning. First came the Sophomores and Freshmen followed by the Seniors and Partials. Both matches were interesting as the teams were well matched, and the playing was excellent on all sides. A large and enthusiastic crowd of spectators showed their appreciation by frequent applauding throughout the games. The line up for the first match was as follows:—

Sophomores.				Freshmen.			
Miss M. G. Fraser.	Forward....	Miss McCaulay	(Captain)				
" Holway (Capt.)	" .....	" Leacock					
" Clark	Centre .....	" James					
" Douglass	Defence .....	" E. Mowatt					
" Mowatt	" .....	" Bayns					

The ball was thrown up at 12.10 by Miss Cox, who acted as referee. The score at the end of the first half was 9—5, in favour of the Freshmen. During the second half, though the play was mostly around the Freshmen's home, the only score made was one basket by the Sophomores, so that the game resulted in a tie 9—9.

Then the Seniors and Partiala appeared on the floor. Their line up was as follows:—

Seniors.	Partiala.
Miss Freeze (Capt.). Forward	Miss Riley (Captain)
" McCally..... " "	" Harding
" Simpson .... Centre	" Selater
" McKenzie. .... Defenc.	" Fogarty
" Dickson..... " "	" Mills

At the end of the first half the score was 3—2, in favour of the Partiala. During the second half the play was fast and furious and the score kept very even. When time was called, however, it stood 8—7, the game going to the Seniors.

All teams are to be congratulated on their playing, which was especially good for the beginning of the season. The enthusiasm shown over these first matches speaks well of the basket-ball interest.

## About the College.

### JUNIOR DANCE PROMISES TO BE A GREAT SUCCESS.

Invitations have been sent out by the Junior Year for a dance to be given in the Royal Victoria College on the evening of Friday the twentieth.

The "Junior Dance" was inaugurated last year by the Class of 1904 with such marked success that it bids fair to become an annual University function. Above all things it is a *University* Dance, for it is given by the members of the Junior Years throughout the Faculties, and is decidedly the most representative of the various "affairs" of the College Year.

For some weeks past a committee has been making preliminary arrangements—striving to make "The Junior" more successful this year than it was last. Their task is indeed a dif-

ficult one, for the standard set by the Class of 1904 was one not easily raised. However, everything is now in readiness—ample time before the date set for the Dance—and from the accounts which we have had of the preparations, we feel that the Committee's expectations will be fully realized.

At previous College Dances there has always been a tendency towards asking too many guests; for the size of the Royal Victoria College is limited and there has sometimes been something very like a crush at the dances. The committee, recognizing this danger has limited the number of invitations absolutely to four hundred. Many of these have already been sent out, and to those who intend going to the Dance (and that should be everybody) we give the advice that they secure their tickets immediately. This may be

done by communicating with any member of the Committee, the personnel of which is as follows:—

Chairman.—Mr. Kenneth M. Perry, Arts.

Treasurer.—Mr. MacLean, Medicine.

Secretary.—Mr. F. Gerald Robinson, Arts.

Dr. Leacock and Miss Cameron, representing the Faculty.

Miss Hitchcock, Miss Michaels, Miss Gillean, Miss Hill, Royal Victoria College.

Messrs. Pruyn, MacLean and Ryan, Medicine.

Messrs. K. M. Perry, W. W. Robinson, R. O. McMurtry and F. G. Robinson, Arts.

Messrs. E. W. Bowness, Kenneth Drinkwater, Wright, Redpath, Science.

Messrs. Harris and Duffy, Law.

The price of invitations is, to the students, \$2.00; giving the guest the privilege of asking one lady.

#### MEDICINE WILL DANCE.

##### Dinner given up in Favour of a Conversat.

One of the great characteristics of this thinking cap of ours—especially where memory is concerned—is that whenever we think of anything in particular, we generally associate certain ideas with it, and hitherto, to the Undergraduates in Medicine, perhaps no two ideas were so connected with student life in the Faculty of Medicine as Cooke and the Medical Dinner. The former, happy to be said, remains still a fact, but the latter is apparently a tale of the past.

Probably many a staid medical man remembers the annual dinner of his day, and the rollicking good time he had, with so many good things before him, and among them the convivial "Stein." Many of his professors may have been present, but what of that? They were of themselves that night—and morning, perhaps. Alas! the Faculty are be-

coming solicitous over our stomachs; they feel that while the starvation process of the boarding-house is doing its work, we should not be allowed to have a feast—or a bowl. They advise us to go to Germany, and yet they don't want us to "Go Down where the Wurzbürger Flows."

Yes, the Medicos had made preliminary arrangements for their Medical Dinner, and our great after-dinner speaker, Mr. Reford, '04, was already engaged on his oration for the eventful night, when the news came that at a meeting of the Faculty they had decided not to support the function this year. Their reasons were not given, and we can't guess them—there are many things beyond reasoning in this world. After the first shock was over, it was decided to call a meeting of the four Years to consider the matter. The meeting was a large one, and the speeches very fine and witty, and the feeling good. Medical students have generally been recognized as having liberal minds, and they showed it on this occasion. They felt the benign Faculty did not wish them to have any more of their boisterous dinners; but to aspire to something more aesthetic. And what could be more pleasing to them than the *Conversazione* and *Dance* suggested and moved by Mr. Martin, Med., '04? The motion was put. Yes, they would have something refined. The result was received with loud cheers and clapping.

The affair will be a purely Medical one, and, as such will be held in the Medical building, it is proposed to perfume the building thoroughly for the occasion, and to give a holiday to the subjects in the dissecting room. It is felt they need it badly.

However, a double clinic at eleven hurried this happy meeting, and we then proceeded to elect delegates to the various other bodies, who still persist in eating.

Toronto—Mr. Nagle, '04.  
 Queen's—Mr. Dunn, '04.  
 Dalhousie—Mr. Richardson, '04.  
 Laval—Mr. Bonner, '04.  
 Science—Mr. Robinson, '04.  
 Arts—Mr. C. Miller, '04.

### LAW WILL DINE.

Notwithstanding the universal dance mania which is spreading throughout the University, the Law Students have decided to have none of it. They will be firm; they will stand to their colours; they will have a dinner.

This important decision was reached at a meeting held on November 9, when it was decided that the Law Banquet should be held as usual. Owing, however, to the dates on which various examinations fall, it has been found impossible to have it this term. The affair will take place therefore about the middle of January.

The following Committee has been elected to make all arrangements:—

Pope, Vineberg, Greenshields, Mathieu and Richards.

### LITERARY SOCIETY HAS INTERESTING MEETING.

The Regular Weekly Meeting of the Literary Society was held on Friday evening, Nov. 13, in the Law Room of the Arts' building. The President, as usual, occupied the chair and after the usual preliminaries introduced the most varied programme yet presented at any meeting of the Society. The object of the committee in arranging the programme was to afford an opportunity to as many new men as possible to take part, and in this respect the meeting was undoubtedly a success.

The entertainment of the evening consisted of a series of readings, speeches and recitations both humorous and serious, which were on the whole well received and thoroughly enjoyed. Among the speakers were

Mr. Murphy, B.A., Med. '04, who gave a brief but interesting outline of the methods persuaded by the famous Dr. Lorenz in his so-called, bloodless surgery. Mr. Christie, M.A. (Edin.), outlined the system employed by the various Literary Societies of Edinburgh University, not neglecting to mention the peculiarities and pride of birth which characterize some of the older ones. The principles of Socialism were very clearly brought out in a short, neat address by Mr. W. J. Healy, Arts '04. Then followed a short talk on an interesting topic of the day, "The principle and possibilities of the Steam Turbine Engine." Mr. London, Science '06, who dealt with this topic, not only showed his familiarity with the subject, but captivated all by his ease and fluency of address.

The readings, which were for the most part of a humorous nature, were well received and served to check any tendency toward a too pronounced seriousness. Among the readers were Messrs. Garvin, Arts '06, McKenzie, Arts '07, McFarlane, Arts '04, and Forbes, Sci. '07. Mr. Irving Vincent, Arts '07, rendered the *momentous moment* of "Quo Vadis" in a manner which showed previous acquaintance with the dramatic art.

The critique of the evening was given by Prof. Cox, LL.D., who though somewhat lenient as a critic threw out many valuable hints, and altogether gave a most interesting and amusing review of the various numbers.

The will of the late Gordon McKay, the inventor of a shoe-sewing machine, gives to Harvard University eighty per cent. of the net income from a \$20,000,000 estate. The donation is to accumulate until it amounts to \$1,000,000, when it is to be paid over and applied to the advance of scientific education and aid of meritorious students.

## **PUBLIC SPEAKING CONTEST.**

### **Prize offered by the Literary Society.**

As previously announced, it was decided by the Executive of the Literary Society to offer for competition at the last meeting of the Society a prize for Public Speaking. It has now been definitely decided that the said prize will take the form of a McGill pendant and will be of the value of twenty-five dollars.

At a recent meeting of the Executive the following rules of competition were agreed upon.—

1. All competitors must be members of the Undergraduate Literary Society.

2. No member will be admitted as eligible for the contest who has not attended at least one-half of the regular meetings of the Society during the current session.

3. Each competitor is allowed to choose his own topic, subject only to the rules of the constitution which exclude the discussion of any controverted point in religion.

4. All prospective competitors must communicate with the Secretary of the Society giving the topic on which he proposes to speak, on or before the first day of February, 1904.

5. In case of an inconvenient number of entries being made, it is to be left to the executive committee to arrange a trial contest for the purpose of determining what names shall be allowed to stand for the final competition.

6. The time limit for each speaker shall not exceed fifteen minutes.

E. W. SHELDON,  
Secretary.

## **A FRAGMENT.**

### **From the A.—S. Chronicle.**

Lytel Myss Muffet sate in the Lybrarie  
Readyng a book one deye  
Tho' there were men there by dozens  
Yet surely 'twas C-s.ns.  
That frightened Myss Muffet aweye.  
—Observer.

## **DELTA SIGMA.**

On Monday afternoon, Nov. 9, a very pleasant meeting of the Delta Sigma was held in the R. V. C. when the question, resolved that letters and memoirs are published too often in the present day, was debated. After the usual preliminaries the President called on Miss Brooks '04, leader of the affirmative, to open the Debate. Miss Lyman '03 was the other speaker on the affirmative. Miss Henry, '04 and Miss Eaton, '07, maintained the cause of the negative. The subject proved a most interesting one for discussion. The decisions of the judges was in favour of the affirmative.

The Nineteenth Annual Lecture is to be given by Dr. Colby, on Nov. 16. The subject will be "Some Experiences of a Book-Reviewer."

## **ARTS' UNDERGRADUATE SOCIETY ELECTS REPRESENTATIVES.**

The Arts men held a meeting on Thursday, and decided to hold their Dance on January 15, but left the election of a Committee until later. The most important business was the election of the representatives which the Undergraduate Society sends to sister University functions. The elections did not cause any great excitement and were put through in the most amicable manner possible. They resulted as follows:—

'Varsity Dinner—A. B. Chandler.  
Queen's Dance—D. Grant Campbell.  
Bishop's Dance—J. G. Dickenson.  
Victoria Conversat—A. D. MacKenzie.

Medical Dance—J. G. Archibald.  
Law Dinner—T. M. Papineau.

A motion was passed instructing the Secretary to write to the Alma Mater Society suggesting that a constitution suitable for Classes should be drawn up and the meeting adjourned.

### THE INTERCOLLEGIATE DEBATE.

The date of the debate with Ottawa University has been definitely settled. On December 4 the representatives of McGill and Ottawa will fight it out. On November 27 the same question will be debated at the Literary Society: Messrs. Howett, '05, and Cousins, '06, will uphold the affirmative and Messrs. Greenshields, '05, and Richards, '06, the negative. Prof. Flux will act as critic. All students are earnestly invited to attend in order that they may be in a better position to weigh the arguments of both sides. Several Professors have also promised to attend.

The three judges for the Intercollegiate Debate will be announced later.

### LECTURES ON MISSIONS.

An interesting course of Lectures on "Missions in China" will be delivered in the David Morrice Hall of the Presbyterian College, by the Rev. Murdoch Mackenzie, a distinguished graduate of the College. Mr. Mackenzie has been in Northern Honan for twelve years and has seen the gradual growth of Christian ideas and is able to speak with authority on his subject. He passed through many trying experiences during the Boxer Rising two years ago, and no doubt his lectures will be illustrated with many personal reminiscences. All students and the public generally are invited to the Lectures. The following syllabus indicates the course that will be followed:

- Monday, Nov. 16, 8 p.m.—China: the Land and People.  
 Tuesday, Nov. 17, 8 p.m.—The Religions of China.  
 Wednesday, Nov. 18, 8 p.m.—Precursors of Protestant Christianity in China.  
 Thursday, Nov. 26, 8 p.m.—The Outlook of Protestant Missions in the Chinese Empire.

Friday, Nov. 20, 8 p.m.—Pioneering among the Honanese.

Saturday, Nov. 21, 8 p.m.—A Mission Station in Inland China.

Monday, Nov. 23, 8 p.m.—Varying Experiences in Mission Work.

Tuesday, Nov. 24, 8 p.m.—The Christian Church in Honan.

Wednesday, Nov. 25, 8 p.m.—The Boxer Movement and Christian Missions.

Thursday, Nov. 26, 8 p.m.—The Outlook for Christianity on China.

Friday, Nov. 27, 8 p.m.—The Claims of Missions on Christian Students.

Saturday, Nov. 28, 8 p.m.—The Bible a Missionary Book.

### LOCAL AND PERSONAL.

DAKERS CAMERON, Arts '03, has entered journalistic work on the staff of the *Herald*. He delights in Criminal Court reporting, for as many of the cases are pleaded in French, and as Dakers writes only in English.... draw your own conclusions. We understand that as soon as the present Editor-in-Chief is moved Dakers will be put in charge of the *Herald*.

T. S. MCMORRAN, president of Arts '03, has migrated to Osgoode Hall to escape the subtleties of our dear old Civil Code.

After a year's study in France, Arnold Wainwright and C. M. Cotton, both of Law '02, and winners of the MacDonald scholarships, have returned home. Mr. Wainwright has entered into partnership with Mr. Peers Davidson, and Mr. Cotton with Mr. McCorkill, K.C., of Sweetsburg.

It was our good fortune to meet them both on the "*boul' Miche*" in Paris and to hear by what plan French was best learned and acquired. The one held that a dictionary diet interspersed with occasional *soirées* at a Classical Theatre was the right way to become a French erudite; the other maintained that the quickest, easiest and most charming way of learning a language was to spend one's

evenings in the company of young ladies speaking that language.

Time alone will tell....

A. E. SMALL, formerly of Sci. '05, after spending the summer in the Westinghouse works at Pittsburg, has decided that electrical engineering is not for him, and has entered the Northwest Mounted Police.

When last heard of CHAUNCEY A. ADAMS, B.A. '02, and CRICK B. MCCALLUM, formerly of Arts '04, were astonishing the natives of Colombo, Ceylon. We wish every success to our plucky globe-trotters.

CHARLIE ORR, Law '03, was the first of the MacDonald scholarship men to cross over. He arrived in Paris at the end of June, in time to profit by the discussion between Messrs. Wainwright and Cotton as to the proper way of learning French. When last we heard from him, he was absorbing one after the other the columns of the dictionary by candle-light in his solitary room in the *Quartier Latin*. He has since been joined by C. G. McKinnon and Harry Blaylock, the other two scholarship men, and by Louis Gosselin and Sam. Chase-Casgrain, the leaders of Law '03.

### THIRTY YEARS AGO.

(From the files of the "McGill Gazette" for 1873.)

The *Gazette* is flourishing, even like the green bay tree. In the first number subscribers were provided with six pages of reading matter and two of advertisements. The next issue boasted of eight pages of reading, and now the Editor comes forward with the statement the subsequent numbers will contain fourteen pages—no less.

In the personal column we see that W. M. Osler, C.M., M.D., the brilliant graduate of '72, is now in London, pursuing his studies in Microscopy.

Among the advertisements, we see

a notice of the First Year Exhibitions, offered for competition in the autumn of 1874. There will be two of \$125 each, and two of \$100. (In June, 1903, there were nineteen offered.)

After all the students were much the same in 1873 as they are to-day. Here is a letter from an irate Med., in which in over a column he loses his wrath on the way in which the football club is managed, and angrily asks why a game was not arranged with the M.A.A.A. this year. And it takes the Editor another column on that editorial page to explain to the aforesaid Med. that it is not his fault.

To conclude, we quote the following sprightly paragraph, as showing the friendly feelings that existed between sister Universities in '73:—"We understand that the Medical students of Bishop's College, that seat of concentrated medical learning, which is so successfully attaining its object of eclipsing our Alma Mater, are contemplating a Footing Dinner. It is to be something very *recherche*. We hear that vast crowds will attend, perchance five or six."

### EXCHANGES.

The following is the beginning of a column article, with very large heading, in the *Minnesota Daily*.

"The sweet, small voices of the Minnesota co-eds are things of the past and the Girl's Rooting Brigade can now rival any caliope that Ringling Bros.' or Barnum ever possessed.

"Due to the excellent management of Miss Frank, over four hundred and fifty girls have signed to help yell Minnesota on to victory."

Now why don't they do something of this sort at the R.V.C.

"Her liquid eyes gazed into mine,  
She raised her lips in dimpled pout,  
I clasped her fondly to my breast,  
And then—my pipe went out."

*Princeton Tiger.*

"I guess I've buttered him up some," gleefully chuckled the waitress at Alexander's as she dropped a plate of pancakes on a customer's head. *Ex.*

"Now, there's some sense to that," remarked the old gentleman, as he spied a skunk.

*Columbia Jester.*

"What makes the cat-boat go so fast?"

Asked little Willie Spink.

"The dog-fish must be chasing it."

Said father, with a wink.

*Jester.*

"I've been spending the Summer at a watering place."

"Why, Harry told me you were on a farm."

"Yes, but it was a dairy farm!"

*Tiger.*

Mary in the kitchen stove  
Once hid her little lamb;  
She left it there—but when she looked  
The lamb was dead—it had been  
cooked;

And Mary said, "Oh, how careless!"

*Jester.*

"This is where we part company," said the comb to the brush as they were set out in the guest's bedroom.

*Ex.*

The higher the fewer—aeronauts.

## TO DEER.

Tubbs.—How did you fellows come to give a stag dinner last night?

Bubbs.—We didn't have the doe for any other kind. *Jester.*

Daughter.—Why, he actually dared to kiss me on the nose!

Mother.—I hope you made him feel how entirely out of place it was.

*Record.*

They stood by the old well together. "How shall we drink?" he said. "There is no bucket here." She lowered her eyes, when she raised them again they were full of water.

*Tiger.*

Ping.—It goes against the grain, doesn't it?

Pong.—What does?

Ping.—Why, the threshing machine.

*Ex.*

Sam Short was so fond of Welsh rarebit,

That his taste led him into the hare-bit

Of spending his days

Near the doors of cafays,

And when he would see one he'd grare-bit.

*Punch Bowl.*

## Class Reports.

### ARTS.

1904.

Talk about the sins of the fathers being visited on the children, it is the sins of the children that are visited on their elders and betters in this nursery of culture. As we entered the somewhat tumble-down halls of learning known as the Arts' building this morning, we were greeted with a solemn warning from a juvenile whose life we spared out of consideration for his family—not to talk about C-s-n-s barking behind the scenes any more. We explain with dignity that we were innocent of any such

low wit. Our colleague of '05 is welcome to that joke and we hereby proclaim that he—not we—is the sole inventor, manufacturer, licensed vendor, and holder of the patent thereof.

While we were making the explanation referred to above, the Class Poet broke loose again, with the following awful result:—

When I consider how my days are spent

In dodging of collectors, great or small,

How with the weight of care my head is bent

In pondering how on earth t' avoid  
 them all;  
 And how myself do waste full many  
 an hour  
 A 'hunting for subscriptions, high and  
 low,  
 Enriching various causes, while I  
 glower  
 To see each day more small my own  
 pile grow;  
 And how to lectures by the score I  
 trot,  
 Yet generally doze the whole time  
 through;  
 Or when a dreary waste of notes I've  
 got  
 Yet know no more than I aforetime  
 knew;  
 When all these vanities I sadly see,  
 I think, when I'm pulled, how much  
 worse 'twill be.

We understand that this masterpiece is called "A Pessimistic Sonnet," or "The Loafer's Lament." To anyone who will make sense of it, we offer the following prizes:—For the first correct solution, the privilege of writing our next report; for the next, a morocco-bound volume of the Poet's poems (to be presented when published); for the third, one year's subscription to the OUTLOOK (on receipt of \$1.00 to cover cost of mailing).

#### 1906.

Kenneth thought he wasn't getting full value for his money; his name has never yet appeared in print, except on the pass list, and his heart longed for notoriety. Now, his ambitious soul, like that of Solomon, has spurred him on to writing a book. You all look thunder-struck, but it is so. Il est intitulé, "How He loves Me!" or "Is My Face Red?" We here reproduce for the first time the opening chapter:

#### CHAP. I. (two chaps.)

The afternoon sun was throwing a mellow light over the well-worn desks, and shedding its radiance

over the drowsy company. Down in the obscurity of the back desks, they sat side by side. Suddenly, above the monotone of the Professor's voice, there was a distinct sound of a feminine giggle, and a sweet voice mumbled: "Now, George, you stop!" As one man, the whole Class turned and beheld an unusual sight. Allan was bubbling over with hysterical laughter, and looking coolly up into George's face. Hope, who sat nearby, had covered his face with his hands, and was blushing furiously.

"Gentlemen, I must ask you what is the cause of this unusual disturbance," came the insinuating voice of the Lecturer. Allan shifted uneasily and pressed one shapely hand close to his lips. In this dire dilemma, like a hero of old, noble George sprang up. Would he see his clinging vine-like *chérie* attacked and torn from his protecting arms? Never! "Sir," came the unfaltering accents, "I - I - I was just squeezing hands." And then, frightened at the sound of his voice (do you wonder), and the condemning glances of stern disapproval, he blushed so furiously in turn that his auburn locks looked white. "Oh! indeed, force of habit, I presume," remarked the Professor. "Well, in future, my dear young Apollo, you will very much oblige me by forgetting your Summer Works, in my Classes, at least!"

#### END OF CHAP. I.

*Dr. Eaton.*—Can anyone tell me another word for malabathrum, a species of sweet wine?

*McC-ll-m* (in sepulchral tones from the back seat) Bay Rum, Sir!

When K-s.h graduates, he is going to become a bill-poster, to judge by the tendencies he now displays in English lectures. It was considered a good joke—by the ancients.

## 1907.

We Freshmen are quite willing to admit that, whatever our erudition in other matters, there are certain matters connected with College of which we are ignorant, and, consequently, the Reporter has decided, in as far as he finds it possible, to obtain the requisite information to publish from time to time.

*Mr. B-ly-*.—No, I cannot describe the R. V. C. for you, as I have never seen it. You might ask *Mr. L-g-n*.

*Mr. B-rnst-in*.—No, the Arts '06 Reporter informs me that his writing "it was us" in his last report was merely a slip of the pen.

*Pres. B-t-s*.—For hints as to the best methods of fulfilling the duties of your office, I should advise you to go to *Mr. McD-g-l*.

The clever and concise dissertation by the strictly impartial R. V. C. '06 Reporter, on our remarks of the week before last, will certainly go down to posterity among the bright gems of polished English literature. Belonging as it does to the highest type of imaginative fiction, it displays in one short paragraph all the qualifications needed to make it at once literarily creditable and immensely popular. The plot is cleverly conceived and brilliantly carried out, and the insinuations against the unfortunate Arts '07 Reporter are accomplished with the delicacy and finesse of a Voltaire. Altogether the possession of its author ought to be a matter for the highest self-congratulation both to the OUTLOOK and to the R. V. C.

Although our brother of Arts '06 disdains to read our "babblings," gratitude forbids our omitting to state that his articles are to us at once a model and an inspiration.

## SCIENCE.

## 1904.

Forward the Science Dance!

Many thanks to "Anonymous" for contributions.

Hamlet's little difficulty wasn't a patch on whether to hear Patti, or take in the Junior Dance.

*Hydraulics*—A conduit or pipe always draws best when about three-quarters full; but if you *borrow* your tobacco always fill to the top.

Friend Lucas is an acquisition to the First Team. He should have been acquisitioned earlier in the season.

Speaking of Hydraulics, questions may be asked for three different purposes:—1st To gain information, 2nd To ball up the Lecturer, 3rd To show you are interested in the subject. The last variety is allowable in very small quantities; *so don't overdo it, old chap*.

At the Canadian Society on Thursday night, the subject is "A. C. Trac-tion Motors." Prof. Owens has secured Mr. Armstrong, chief engineer of the General Electric; Mr. Lincoln, of the Bullock (*was you ever—in Zinzinnati?*), and a Westinghouse man, to thrash out the merits of the high and low frequency types, and he says there will be "something doing." Turn up gentlemen, and create that good impression.

Dr. McKergow, professor of weirs and orifices tells this story. It is printed now for the first time in any paper:—

At a publishers' dinner in Toronto the other day, the "Life Publishing Co." was represented by a gentleman whose roof-thatching was worn away in places. He was down for a speech. The chairman introduced him, and said, "My bald-headed friend will now favour us." So he got up and made the following disjointed re-

marks:—"Yes I'm bald, and proud of it. The chairman has a magnificent head of hair, black, sleek, and glossy. Hair never grows on a woman's face. In fact hair never grows where there is any activity. That's why the chairman isn't bald."

Hod Stovel, Sci. '03, spent last summer in Europe. Walking aimlessly down the Strand one day, he saw in a second-hand bookstore a copy of that famous text-book entitled "*Hank, The Old Sea-Dog.*"

"How much do you want for that," says Stovel?

"Let yer 'ave it for two bob," says the bookseller.

"Too dear," says Hod, "why in McGill, when the fellows finish their Third Year, they can't give them away."

#### 1905.

The High Miffiff continues to give us evidences of his wisdom and greatness, with each Thursday. His latest edict is to the effect that anybody tapping his pencil three times in quick succession may be seized by his Classmates and kicked out of the room.

The holiday slope was a success—even Burpee walked out to Westmount and back, all the while muttering Calculus. It is also said that Jack Campbell and Yan McLeish played peaknuckle. Others celebrated it in a more "Royal" fashion. Cottontop and Redroad were so attracted by certain charming performers that only the utmost efforts of the police and "Pinto" restrained them from personally signifying their deep appreciation of the acting. We also regret to say that when the alarm of fire was sounded, our worthy President took advantage of the excitement and attempted to purloin the silver railing which surrounded his benevolent carcass.

"Spike" Mooney by a sudden streak of luck is the happy possessor of 76 cents, four football tickets, a Chinese laundry slip, three marbles and a lead spoon. Henceforth Killarney McKearty's motto is: "What I have, I hold."

After this, Ashley, don't ask so many silly questions, even in the Dean's nursery.

Dickson! When unable to understand the mutterings of the Miffiff use a megaphone in order that he may hear your weak little voice.

Everybody has probably noticed the amusing antics of a puppy playing with a bone or a stray shoe; but when E. Burton Jost adopts similar tactics it is high time for his paw to take him to a foolish factory and have his "bean" sounded.

We congratulate Bob Miner on the completion of the repairs on his roof. When seen by the Reporter he was studying the almanac so as to learn the date of the next meteoric shower.

The Reading-Room Committee died yesterday. Arrangements for the funeral will be published later.

#### 1906.

The King's birthday is past and gone, and by one Class, at least, the occasion was duly celebrated at McGill. The first outburst of patriotism occurred at Physics Lecture, where the National Anthem was rendered with great feeling and effect by the entire Class. But what was perhaps the most successful event of the day was the Royal Salute, fired by C-le in the Chemical Laboratory, at 12 noon.

Bra-n-n is not much worse than the rest, but he has the bad luck to be caught in the act.

C-le has discovered a new equation in Chemistry, viz.:

Hydrogen + a match =  
Explosion + caution money.

*Professor.*—If the level be turned about its basis, and the bubble remains in one end of the tube, what conclusion may be drawn?

*W-n-er.*—That the bubble has not moved.

### 1907.

#### ANCIENT RHYMES REVIVED.

It has been thought advisable to revive a series of rhymes entitled as above. This is to be done for the benefit of the Softies, who, being so *wise*, may be forgetting what they learned in the days of their childhood.

The first we will call—

#### THE BUSY SOFT.

How doth the little busy Soft  
Delight to bark and bite;  
He catches Freshmen all the day,  
And eats them up at night.—Nit!

Some of the men of Science '07 have come to the following resolutions:—

Resolved:—1st. That when they are Sophomores they will "borrow" no Caps off the men of '08.

2nd. That next year they will at least attempt to set a better example to the Freshmen than has been set them this year by the Softies in general.

3rd. That they will try to dissuade their brother Softies of the Medical Faculty from going so far as to show their lady friends through *every* part of their building.

4th. That they will do all they can to help their Year to keep from being beaten in sports by the Freshies. And that they will follow the example set by this Year's Softies in not being beaten in football by them.

#### MEDICINE.

### 1905.

The date of the Junior Dance is now close at hand, and every effort is being made by the members of

the Committee to make this the Dance of the Year. The number of guests has been limited to 400, so do not put off purchasing your ticket until it is too late.

It is a matter of universal regret that for this year, at least, the Undergraduate Society, at the advice of the Faculty, has seen fit to substitute some other form of entertainment to take the place of the Annual Medical Dinner. The abolition of such a time-honoured institution means a *decided loss* to every individual Undergraduate in Medicine, and every effort should be made by the students to regain their *lost* ground, by *firstly* endeavouring to remove the *prime factor*, which has been effectual in bringing about such a radical procedure. *Surely*, this is NOT to be the ending of Medical Dinners for McGill—the cessation of celebrating that one *single* night of the year, when students can *meet* and *listen* to the members of their Faculty, and come in friendly contact with them, *not* as professors, but as *men*.

L. RYAN.

### 1906.

At a "Class Meeting" of last week Messrs. O. B. Keddy and O. R. Rothwell were elected representatives of '06, to the Committee for the Medical Conversazione.

An impromptu musical programme was rendered in the Physiology Class on Friday, the most interesting numbers of which were:—

Chorus The Class "Good Morning."  
Solo Prof. M. "Austrian Hymn."

The last was unanimously voted a success.

Poor Freshies! Some one really ought to tell them, out of pity. Their freshness is of such verdant type. The burden of their prattle ever since

Sports' Day has been "What we did at the Sports." Their brilliant (?) work placed them in third-class honours and their innocent natures have been unable to follow the example set them by even so slight a measure of success. Any other Year would have considered such success (?) blank failure and have kept quiet over it. They can perhaps be allowed to claim some third rate, very amateur athletes among their number, but neither at the College nor at the Intercollegiate meets were they able to follow the example set them by '06 and produce record performances. It's high time to tire of your rattle Freshies, and take up with something less childish, and less conducive to your remaining the laughing stock of others.

"Cholly! I lak your hair."

1907.

Mr. Peters and Mr. Landry are our representatives on the Medical Conversat Committee. We could not have done better.

K-nn-dy and W-is-n have by mutual agreement returned to the pernicious habit. No more Vs in jeopardy.

Prof. L-n is "abominably energetic." So say the Sophomores who want to cool him off. Prenez-garde the tap.

The King's birthday was right roy-

ally opened in Old McGill's Medical Faculty, by the Freshmen singing the National Anthem at the 9 o'clock Lecture.

In the afternoon the Sophomores made a feeble effort to follow our example, but only succeeded in jumbling through "Good morning, have you used Pear's Soap?" Wake up Sophys. "Do something to make '06 famous."

Lose another banner. Let the Freshie beat you. Any old thing, but become famous at all costs.

Have you seen the great detective  
In the year of Naughty Six?  
He's the finest thing that ever  
Stayed on this side of the Styx.

It was he who lost the banner,  
It was he who found it too.  
It was he who smoked his cigarette  
Before the games were through.

It was he who thought the Freshies  
Ought to see him with a girl,  
So in the old dissecting room  
He made our pulses whirl.

And he stood there like Napoleon  
With his head tossed haughtily,  
For he knew we were all looking  
At the egotistic He.

No more of the S. S. S. joke, the  
Sophomores are going to have an  
S. S.—Watch it.

**LAW REPORT.**

The McGill Boxing Club is responsible for a great deal of undue excitement in the ordinarily quiescent Law Faculty. It has been discovered that there is a realm of law quite apart from the Statutes and the Civil Code. Co-l-n, who has been revising the Civil Code of late, is said to have first realized the importance of this new branch of law—muscular, physical law, making stronger the “arm of the law,” and aiding the lawyer in pointing his arguments and leaving the impress of his strength on surrounding objects, as Gladstone that of his signet ring on the Exchequer box.

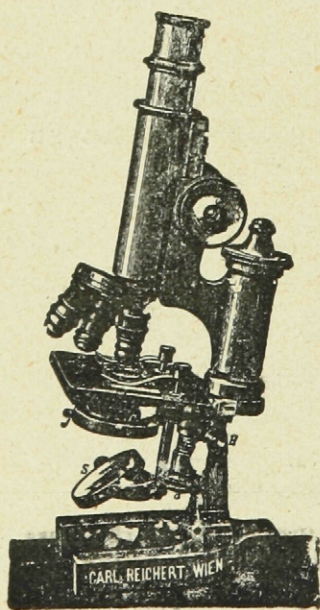

Co-l-n has been observed several times in earnest conversation with Og-l-v-e and W-dl-gh, and it appears that he has been arranging a series of exhibition matches between those gentlemen and himself, to take place during the Christmas holidays, when everyone will be free to attend.

DeW-t has already bought up all seats with a view to making up a possible deficit in the Undergraduates' fees.

The Faculty of Law, and especially the First Year, is to be congratulated upon having two of its men chosen to represent McGill in the Intercollegiate debate with Ottawa University. Messrs. Couture and Calder have the best wishes of Law men for their success.

Rip Van Winkle actually appeared in the Practice Court the other day, looking for all the world as if he had just waked from a prolonged hibernation of twenty, or rather a hundred years. Thin and ivory pale he was, from his long fasting; stooped and narrow-shouldered, and not more than five feet high, with gray, dishevelled hair, pompadour, shock-upright, surmounting a peering straining narrow face and high nervous forehead, and piercing eyes sharpened by small old-fashioned square spectacles, his stiff grayish moustache partly hiding a tightly compressed, protruding lower lip. His high collar, soiled and crushed, seemed shamefully eluding the embrace of a bedraggled tie.

He sat with head alternately bow-

ed and erect, an occasional fleeting smile losing itself almost instantly in the shadow of eyes or mouth; his thin, nervous, twitching hands—stiff as if paralyzed—playing abstractedly with the head of an old umbrella. Once or twice, with sudden, startled resolution, he changed his seat, moving with a sort of straight and resistless dash for the place he sought. With as sudden resolution,

as if bewildered by time and place, and eager only to leave courts and quarrels behind, he glided quick as thought past the door's rebound, and was seen no more.

At their last meeting the Law Undergraduates elected T. Kerr as their representative to the Law Banquet, at Laval.

## The Royal Military College.

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Seven commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of 9½ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from \$750 to \$800.

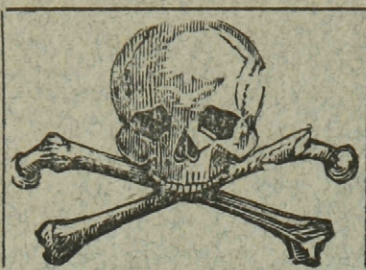

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination or for any other information application should be made as soon as possible to the Adjutant General of Militia, Ottawa, Ont.
